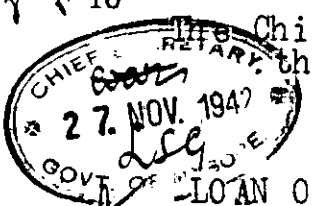
No.RF.184-42/Pol.

From The Secretary to the Hon'ble the Resident in Mysore.

To The Chief Secretary to the Government of Mysore.



Bangalore, 27th Nov. 42

LOAN OF BORING EQUIPMENTS.

Sir,

The Superintending Engineer, Southern Aviation Circle, Madras, writes that immediate arrangements for water supply at aerodromes near Yelahanka and Kolar have to be made by sinking a number of bore wells at these places. He understands that there is certain boring equipment available with the Government of Mysore which could be used for the purpose. The Hon'ble the Resident would be grateful if the Government of Mysore would kindly lend as much boring equipment as possible to the Executive Engineer, Aviation Division, Bangalore, as early as possible, so that the war works may not be impeded for want of sufficient water supply at the aerodromes.

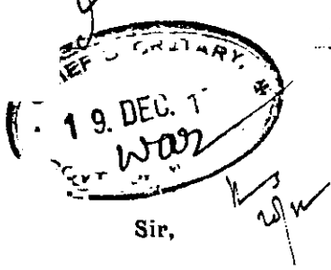
Date 18th December 1942.

To



The Chief Secretary to

Government of Mysore,

Bangalore.

Sir,

Subject:- Loan of Boring Equipments.

With reference to your letter No.2483-84/I dated 30th November 1942 forwarding a copy of Residency letter dated 27th November 1942 on the above subject, and enquiring if any boring equipment is available and could be spared to the Military Department, I have the honour to state that as per requisitions from the Military Department 4 drills are already working in the military areas round about Bangalore and only one plant can be spared for the present for work at the Aerodrome at Yelanka. A copy of Sanitary Engineer's letter in the matter is enclosed for the information of Government. A copy of Sanitary Engineer's letter was also sent to the Executive Engineer, Aviation Division, Bangalore, for information.

I have the honour to be,
Sir,
Your most obedient servant,

V. Ramamurthy

DIRECTOR OF PUBLIC HEALTH.

JBR.

Letter dated 5th December 1942 from the Sanitary Engineer, Bangalore, to the Director of Public Health in Mysore, Bangalore.

Re: Loan of borewell plants to the Executive Engineer, Aviation Division, Bangalore, for sinking borewells for affording water supply facilities in the Aerodromes at Yelahanka and Kolar.

—

With reference to your Memo No.J.193-27 dated 1st December 1942 on the above subject and requesting an immediate report being made in the matter, I have the honour to state, that the Executive Engineer, Aviation Division, Bangalore, with whom I inspected the Yelahanka Aerodrome on the 2nd instant desires 40 borewells in all to be put up at Yelahanka and Kolar. Even taking about 3 months time on an average for one borewell plant per borewell, it will be seen that a number of our borewell plants out of the 15 plants in fair order that we have with us, will have to be diverted for this work alone, stopping all our rural water supply improvement activities This is not desirable. Further, for the Military Department, according to their requisitions, borewells are being put up in areas round about Bangalore and 4 drills are already working. I am, therefore, proposing to shift two more borewell rigs for use of the Military and I have also intimated the Executive Engineer, Aviation Division, that one plant which is now at Arakere, Seringpatam Taluk, will immediately be shifted for use at the Aerodrome at Yelahanka. During discussion I have intimated the Executive Engineer that it is not at all practicable to think of putting down such a large number of borewells as 40, which will not only mean cost but also what is more important, a lot of time. As an alternative, it was suggested to him that about five or six borewells put to a depth of about 150 ft. to 200 ft. may be utilised for water supply to the entire camp in the event of the supply bein found to be adequate.
